1. As indicated at references A and B, the Schweizer 2-33 gliders used for the Glider Pilot Scholarship impose certain physical limitations with respect to weight and size of the pilot. Therefore, the student pilot’s size must promote comfortable positioning in the cockpit with good visibility in all directions as well as being able to reach the controls for full movement. The physical limitations for height and weight are:

</tbody>
</table>

2. I understand that if I am selected for the Glider Pilot Scholarship, I am required to meet the limitations listed above by 1 June of the year of the course. If I have not met these limitations at that time, I will be deleted from the selection list. If, for whatever reason, I fail to meet the limitations listed above when I arrive at the Regional Gliding School, I will be returned to unit (RTU).
